MEMORANDUM

TO: Principal Investigators

FROM: Council of Principal Investigators Executive Committee

SUBJECT: Effects of Physical Plant on research at Texas A&M University

The CPI Executive Committee requests your feedback regarding the impact of service provided by the Texas A&M University Physical Plant on your research. Our purpose is fact-finding at this stage, to determine how widespread (or not) concerns are. Keep your answers brief but specific; details such as specific rooms or equipment requiring service/repair/renovation and dates are helpful. Feedback can be submitted at <http://cpi.tamu.edu/activities/discussions/physical-plant> and the discussion topics are as follows:

- Examples of maintenance/repair/renovation work done in an exemplary fashion or incorrectly/incompletely by Physical Plant
- Examples of fast or slow response time for maintenance/repair/renovation work done by Physical Plant
- Examples regarding the appropriateness of Physical Plant service charges
- Impact (positive or negative) of Physical Plant services on research efforts
- Impacts (positive or negative) of Physical Plant services on retention of faculty, research staff or graduate students

If you would prefer to submit comments anonymously or if you have any questions about the discussion forum you can email the CPI Coordinator at cpi@tamu.edu or 979-458-1861.
